

# International Youth Math Challenge

## Pre-Final Registration Costs Information

### 1. What are the registration costs?

The International Youth Math Challenge is one of the biggest online math competitions and gives students around the world the opportunity to unleash their creativity and math skills! This global competition is attached to many costs which include human resources, technical infrastructure, materials, and much more. Since IYMC is an independent and globally available competition, we are thankful for our sponsors that cover most of the expenses!

In order to make this opportunity on an international level possible, we ask the participants of the pre-final round to cover the registration costs of 8 USD. The registration costs are necessary to provide the resources for individual evaluation of this year's competition.

### 2. Do all participants have to pay the registration costs?

Only successful participants of the qualification round (1. stage) that *want* to register for the pre-final round (2. stage) have to cover the registration costs: The evaluation of the pre-final round on a global stage requires a huge amount of time and resources.

*Do I have to pay if I was successful in the first round?:* It is not mandatory to participate in the pre-final round, however, you have to cover the registration costs if you want to participate in the pre-final round. You will *always* receive a certificate of your results in the qualification round!

*Are there any other costs in other rounds?:* No, the registration costs for the pre-final round are the only costs that have to be covered by participants of this year's competition.

### 3. How to pay the registration costs?

We will inform all successful participants of the qualification round about the registration process for the pre-final round. Registration costs have to be covered before the pre-final round starts if you want to participate in the pre-final round. We also provide group payment options for teachers and groups. If you have any questions or issues, do not hesitate to send us a message: [submission\(at\)iymc.info](mailto:submission@iymc.info)
